

solar  analytics

THE ONLY MONITORING YOU NEED

Everything on a single dashboard.

Solar Analytics Monitoring gives you visibility over your entire fleet on a single dashboard.

Our simple-to-install 3G device will measure solar production, energy consumption, battery charging, system performance, faults and cost savings.

Powered by our sophisticated diagnostic tools and patented algorithms, the Solar Analytics Dashboard comes packed with features for you and your customers.

Improve competitiveness, manage maintenance, stay top of mind and build lasting value for your solar business.

It's the only monitoring you need.

A FEW OF OUR FEATURES

Installed in under 30 minutes

Compact (2 pole) DIN rail mount

3CT and 6CT models

Single, dual and three phase in one unit

Measure any AC circuit

Works with any inverter

Real time data (from 5 second intervals)

Expected vs actual solar production

System fault notifications

System performance analysis

Configurable savings data for bill checking

Battery sizing calculator

Battery monitoring

Fleet and end user views

Co-branded dashboard

Bulk data uploads and downloads

LGC grade interval measurement

PPA billing and invoicing

1% revenue grade accuracy

Australian-based support team

SAVE TIME

Our fault and performance diagnostics provide you with insights designed to reduce site visits and time spent on site.

With one dashboard for all inverters and AC circuits, you get consolidated fleet management in a single view.

IMPROVE SALES

Bundle the Solar Analytics user-friendly dashboard into your solar offering to increase sales conversions.

By staying connected to your customers you can also increase future sales of upgrades or new products and services.

REDUCE SUPPORT COSTS

Most Solar Analytics installations can be completed in under 30 minutes and our expert local support team are here to help.

Our friendly team will also handle your customers' support enquiries leaving you to do what you do best.

FUTURE-PROOF YOUR OFFERING

The energy world is rapidly changing. Solar Analytics wants to empower people to navigate the new energy landscape.

Prepare your customers for energy trading, storage and load management so when the time comes, it's you they choose.

" It's absolutely imperative that you have Solar Analytics Monitoring, otherwise you just don't have the clarity that you need. " - Gareth, GreenElec Pty Ltd

Solar Analytics is an Australian software company founded by solar industry veterans, data scientists, developers and passionate PV experts.

We design, develop and supply intelligent solar and energy monitoring solutions.

Our mission is to empower people to navigate the changing energy landscape.
